## ***#1 Sex Position - The Lazy Cradle***

Let's start with one of the hottest sex positions! *The Lazy Cradle* will give your lucky lady a naughty workout she won't soon forget. Start in missionary position, then lean back and pull her pelvis up onto your thighs. You thrust from a kneeling position while holding her thighs from underneath. This sex position creates an AMAZING angle for G-spot stimulation that she will love!

## ***#2 Sex Position - The Deep Stick***

*The Deep Stick* sex position makes for an easy and sexy transition from *The Lazy Cradle*. Have your lover raise her legs and wrap her ankles around your neck. This allows deep penetration, as you thrust while in a kneeling position. Yum!

### ***#3 Sex Position - The Bevel***

*The Bevel* is a complex sex position so take it slow. Have your lover place one of her legs on your shoulder and stretch the other one out. *The Bevel* position takes this old Kama Sutra pose one step further; instead of her changing the positions of her leg, you spread your legs in a kneeling position and sit on top of her other thigh. Her body squeezes you delightfully while you penetrate her at an angle that feels ohhh so good.

## ***#4 Sex Position - The Pirate's Bounty***

*The Pirate's Bounty* is another sex position that works best when your lover is elevated. Put her butt on a pillow and have her spread her legs. As you enter her, she bends her knees and welcomes you in. Her legs are kept inside of your arms so she can bend them back over your forearms. This is not only a comfortable sex position but also one that you both can sustain for a while. Also a great position for face touching.

## ***#5 Sex Position - The Chapel***

*The Chapel* sex position is relatively easy for your lady and definitely comes with perks for you. She lies on the edge of the bed and spreads her legs wide. You grab on to her ankles, or her feet, while you thrust in a standing position. She gets deep penetration while you get a clear view of her sexy body.

## ***#6 Sex Position - The Coachman***

*The Coachman* sex position is a challenging angle, but it's not as hard as it looks. (Although it will make you plenty hard when you try it.) Your lady lies her stomach down on the bed and pushes herself towards the edge of the bed where she can meet you. She stretches out one leg straight on the edge of the bed and keeps her other leg on the floor. Bending your knees slightly you enter her while she holds on tightly, clutching the sheets in ecstasy. Don't forget to give her a light smack on the butt for a little fun.

## ***#7 Sex Position - The Parallel***

For this wild sex position, have your lady sit on your lap so you are facing each other. Have her spread her legs wide and move them forward, so that her feet touch the bed. Adjust your body and hers so that you can penetrate. You can choose to slip your arms under her knees or simply grab hold of her breasts. If there is too much strain on you, she can support some of her weight with her arms.

## ***#8 Sex Position - The Reverse Cowgirl***

If you're crazy about the butt, you can't do much better than *The Reverse Cowgirl*. Lie on your back and have her sit on your lap, facing away from you, either kneeling or squatting. She can be leaning forward or holding her upper-body straight up. From there, you can grab her ankles or even better... grab her hair or give her a good fun spanking.

## ***#9 Sex Position - The Empress***

*The Empress* sex position is similar to *The Lazy Cradle*, except that this time, you sit back and take it easy. Lie on your back while she kneels and lowers herself onto your lap. She sits on your lap, while leaning back and supporting herself on her hands. She moves her legs forward and bends her knees, keeping her feet flat on the bed. She rides you using her hands and feet, all the while you touch and grope her legs. You could look up and enjoy the sensation or hold your head upright to get a great shot of her naughty places. BONUS: For the best G-spot orgasm, have her lean back, supporting her weight on her hands.

## ***#10 Sex Position - The Dominating Doggy***

Doggy style is just about every woman's FAVORITE and *The Dominating Doggy* is how to take it to the next level! It starts out as normal, then lean over her body, taking her down to the bed. Still inside her, thrust away while holding her by the head, pinning her against the sheets. Mmmm!

**Expert's Tips:** Since this is a dominant move, take the dominant role all the way and talk dirty like her "sex master." Be confident, powerful and talk dirty (if she's into it). Using a dominant position and a dominant frame of mind, you can help her play the role of submissive, climaxing student.
